

WASTE AUDIT PLAN

Make a note of the waste streams that are generated onsite. <i>eg general waste, recycling, hazardous waste</i>	
What process is the waste being generated from? <i>eg office, production line, warehouse</i>	
Could you segregate more waste for recycling? <i>eg food waste, packaging</i>	
How many waste companies are you using? <i>eg Veolia, Biffa, PHS</i>	
Would reducing your number of waste companies to just one be beneficial?	
Does the service from the above meet your expectations?	
What volume of waste did you produce in the last 12 months?	
Could this waste be reduced?	
Where does your waste end up? <i>eg Landfill</i>	
Are all your Waste Transfer Notes and Duty of Cares up to date?	
What waste exemptions do you need for your onsite waste management processes? <i>eg baling card/plastic, storing waste</i>	

If you feel your waste management process can be improved, please call 03330 095 295 and ask for James Morton or Alvin Woodcock and book a 10 minute online meeting [here](#).

Baxter Environmental are here to offer free advice and ensure you have a robust waste management plan.
